

Customer/Tenant Cockroach Gel Bait Prep Sheet

Boughton's Pest Control will be treating your Premises on _____, 20_____
at _____AM/PM. It is not necessary to vacate your premises after treatment is complete.

- * Remove all items from kitchen drawers and cupboards, especially ones that contain food and under the sink. The tops of stoves and refrigerators should also be cleared off so they can be moved.
- * Remove all items from bathroom cupboards and vanities.
- * Move all furniture at least 2 feet away from the wall and as close to the center of the room as possible to allow access for baseboard treatment.
- * Pets do not need to be removed from your premises.

The gel bait treatment for cockroaches:

- * Cockroach gel baits are not harmful to people who suffer from allergies, asthma or lung disease because there is no spray drift.
- * Cockroach gel baits are meant to attract the cockroaches to it, you may notice more roach activity after an application. The gel bait makes the cockroaches become disorientated so they may wander after feeding and soon die.

Once you return to your premises, no chemicals such as Raid or bleach are to be used by the customer/tenant after the cockroach gel bait treatment, as it will contaminate the gel bait.
